PROFESSIONAL SUMMARY

BIS graduate specializing in data analytics and business intelligence, with complementary expertise in front-end development. Proficient in transforming raw data into actionable insights using Python, SQL, Power BI, Tableau, and Excel. Experienced in building automated data pipelines, interactive dashboards, and data exploration tools that support strategic decision-making. Committed to driving business growth through data-driven solutions, workflow automation, and AI-assisted analytics.

TECHNICAL SKILLS

Data Analytics:	Python · SQL · Power BI · Tableau · Excel · Streamlit · Google Sheets
Front-End:	HTML5 · CSS3 · JavaScript · React · Responsive Web Design · PWA
Automation & AI:	n8n · Playwright · Google Gemini · AI-assisted Analytics · Workflow Automation
Tools:	GitHub · VS Code · Power BI Desktop · Tableau Desktop · Microsoft 365

WORK EXPERIENCE

Freelance Data Analyst & Front-End Developer

2025 – Present

Self-Employed — Multiple Clients across Egypt & Saudi Arabia

- Delivered end-to-end data analytics solutions for multiple clients across retail, food & beverage, and HR sectors — including dashboards, automated reports, and KPI tracking systems.
- Analyzed large datasets using Python (Pandas, NumPy), SQL, Power BI, and Tableau to extract actionable business insights and support executive decision-making.
- Built automated data pipelines and cleansing tools processing 1M+ rows, reducing manual reporting time significantly.
- Developed AI-powered data extraction tools using Google Gemini, Playwright, and Streamlit to automate business workflows.
- Designed and deployed front-end web applications and PWA platforms serving Arabic-speaking markets with mobile-first performance.

PROJECTS

Cinematic Insights & Entertainment Analytics Dashboard | Power BI

Data Analysis

- Developed a comprehensive, interactive 3-page Power BI dashboard to analyze the cinema and entertainment industry (Movies & TV Shows) across more than 50 years.
- Delivered deep, data-driven insights into revenue trends, audience ratings, and genre performance to assist producers and industry executives in making strategic decisions.
- Skills: Data Visualization, Power BI, Business Intelligence, Data Analytics, Dashboards, UI/UX Design.

DataClean Pro

Data Analysis

- Built an automated Python data-cleansing tool with row-level validation, deep type detection (dates & numerics), and duplicate prevention.
- Automated date normalization, numeric validation, programmatic Excel formatting (YYYY-MM-DD), and high-performance processing — up to 70,000–100,000 rows/second using NumPy and vectorized operations.
- Generates comprehensive operation logs with posting details and data statistics.

Universal Data Extraction Portal / Professional Data Extraction

Data Analysis

- Developed a business data extraction gateway based on Streamlit, using Playwright for incognito automated browsing and Google Gemini for creating dynamic charts.

EDA System

Data Analysis

- Built a professional data exploration system using Streamlit to automatically analyze uploaded files and display results in a modern, intuitive design.

IKEA Interactive Sales Dashboard

Data Analysis

- Developed an interactive dashboard tracking time trends and peak seasons to identify sales fluctuations.
- Implemented geographical sales distribution analysis with a smart diversifying palette to correlate regional performance.

Human Resources Data Analysis

Data Analysis

- Built an interactive HR dashboard to help decision-makers understand employee attrition and improve the work environment.

Misuo Sales Dashboard	Data Analysis
- Created an interactive Excel dashboard for a multi-product retailer to track sales performance and growth opportunities. - Delivered management-ready reports highlighting performance trends, product mix, and immediate improvement actions.	
Call Center Performance Dashboard	Data Analysis
- Developed an analytical dashboard to monitor call center KPIs including response time, resolution rate, and agent performance. - Delivered actionable insights to help management improve customer service efficiency and reduce operational costs.	
Order-Now Arabic Digital Food Ordering Website	Front-End
- Developed a fully integrated responsive food ordering platform with Arabic language support and fast checkout experience. - Designed intuitive UI flows for menu browsing, order placement, and user interactions.	
My Order PWA Customer Service Platform	Front-End
- Built a progressive web app for fixed customers in Saudi Arabia delivering a smooth, fast service experience. - Implemented responsive design, offline-ready PWA behavior, and mobile-first usability.	
AI Chatbot with Gemini Integration	Front-End
- Implemented an intelligent, conversational chatbot integrated directly into the website using the Gemini AI API, designed for human-like, context-aware responses. - Provides instant, round-the-clock support, addressing common FAQs and automating customer interaction to enhance satisfaction and reduce operational costs.	
Secure Payment Gateway Integration	Front-End
- Built a secure, PCI-DSS compliant payment interface supporting diverse transaction methods including credit cards, installment plans, and digital wallets. - Features encrypted data processing and a streamlined UI to ensure a safe, frictionless, and professional checkout experience.	
Dynamic Restaurant Management Dashboard	Front-End
- Built a fully dynamic administrative dashboard to streamline restaurant menu operations. - Enables real-time CRUD operations (Create, Read, Update, Delete) on menu items with seamless data integration between the front-end and backend database.
